Subject: Approval to disable/remove the A2A radio button from UI

Hi Jennifer,

During testing of UI Refresh on Azure,there were a couple of issues reported on A2A Channel
of IRS Submission.
There may be some issues related to A2A as we are focusing only on UI Channel for IRS
Submission and there is no development plan for A2A.

Since we are using only UI channel, is it okay if we disable/remove the A2A radio button in
UI.
Please find attached screen-shots of the radio button in Old and New UI.

Can you please provide the approval to disable/remove the A2A radio button from UI.

Regards,
Ramya Tantry
